Key findings

region and channel have strong categorical association (Cramér's $V=1.000$).; customer_id explains substantial variation in marketing_roi ($\eta^2=0.589$).; customer_id explains substantial variation in marketing_spend ($\eta^2=0.558$).; customer_id explains substantial variation in revenue ($\eta^2=0.536$).; date is nearly unique per row (100.0%).; marketing_roi is nearly unique per row (100.0%).; marketing_spend is nearly unique per row (100.0%).; nps is nearly unique per row (100.0%).

Caveats and assumptions

Fixtures are synthetic validation data. Uploaded datasets remain the source of truth; field aliases are recorded in the build metadata.
