

HR Attrition Analysis

Student portfolio project

Identify departments, tenure bands, overtime, and income patterns associated with attrition.

project_id: hr_attrition | template_id: root_cause | source_rows: 48 | prepared_rows: 48 | generated_at: 2026-08-11T06:45:01.874100+00:00

Executive summary

HR Attrition Analysis analyzed 48 rows across 6 fields. The reusable root_cause BI template presents source-backed KPIs, drivers, and detail tables. Total monthly income is \$5.0M with a transparent synthetic validation fixture or uploaded source.

Drivers and trends

Attrition by department

Income by overtime status

Detail by department

department	count	sum	mean
Sales	12	6.0	0.5
HR	12	5.0	0.4166666666666667

department	count	sum	mean
Engineering	12	2.0	0.16666666666666666
Operations	12	2.0	0.16666666666666666

Detail by overtime

overtime	count	sum	mean
No	24	2620025.0	109167.70833333333
Yes	24	2383002.0	99291.75

Key findings

department and overtime have strong categorical association (Cramér's $V=1.000$).; employee_id is nearly unique per row (100.0%); monthly_income is nearly unique per row (100.0%).

Caveats and assumptions

Fixtures are synthetic validation data. Uploaded datasets remain the source of truth; field aliases are recorded in the build metadata.
