2025-01-30T00:00:00	1	166.39	166.39

Key findings

category and merchant have strong categorical association (Cramér's $V=1.000$).; amount is nearly unique per row (100.0%); date is nearly unique per row (100.0%).

Caveats and assumptions

Fixtures are synthetic validation data. Uploaded datasets remain the source of truth; field aliases are recorded in the build metadata.
